

MPS-ABC Certification Standard

Certification Criteria

Date of issue: 6 February 1995

Revised: 18 December 2019

Version: EN MPS-ABC Certification Standard v16

Adopted by: The MPS Council of Stakeholders on 4 December 2019

Ratified by: The MPS Board on 18 December 2019

Effective from: 1 January 2021

In case of doubt or ambiguity, the Dutch version of the certification standard prevails.

No part of this certification standard may be reproduced and/or published without prior permission from Stichting MPS.

The MPS-ABC Certification Standard consists of the following documents:

- **MPS-ABC Certification Standard**
- MPS-ABC Ground Rules
- Terms and Definitions
- MPS Governance
- MPS Active Substances Black List

MPS-ABC

Purpose of the standard

By facilitating the keeping of usage records on the environmental themes of crop protection agents, fertilisers, energy, waste and water, MPS-ABC provides the participant with insights into its relative environmental performance compared with breeders of similar products under similar production circumstances. Usage is expressed in points, which subsequently leads to an A+, A, B or C qualification. In addition, the participant gains an insight into its usage levels in the form of tables and graphs. Not only does this make its environmental performance transparent, but MPS-ABC also provides a management system that helps companies to become more sustainable.

Relationship to other MPS standards

Breeders can implement MPS-ABC as an autonomous standard, but they can also use it as a step up to participation in other MPS standards to make their own performance more sustainable and verifiable. For example, MPS-ABC is the underlying certificate for obtaining MPS-GAP and MPS-SQ certification, both of which contain production requirements in relation to traceability, environmental protection, safety and hygiene (MPS-GAP) and good working conditions (MPS-SQ). In addition, MPS-ABC forms the basis for participating in MPS-ProductProof, which enables breeders to demonstrate that their ornamental products are free from certain active substances and therefore comply with retailers' specific requirements.

MPS-ABC criteria

A. Basic criteria for participation in MPS-ABC

A.1 The Certification Body (CB) must be in possession of a copy of the quotation for participation in MPS-ABC, signed by the participant.
Companies may only participate in MPS-ABC after completing the application process via the CB and submitting a signed copy of the quotation for participation in MPS-ABC.
A.2 MPS-ABC is a company record-keeping system
A.2.1 MPS-ABC is a qualification encompassing the entire company based on its usage records. Therefore, companies cannot participate solely on the basis of an individual crop, a selected number of crops, part of a crop or a single site within the company. Mixed-operation companies must keep records of usages across all their agricultural operations.
A.2.2 If a company has several locations, usages for these sites are recorded in separate sets of sub-records under the same MPS number.
A.2.3 Companies unable to distinguish between usages in agricultural and non-agricultural operations in their accounts (e.g. energy usage for offices or residential units) must record their total usage figures.
A.2.4 In situations in which it is possible to clearly distinguish between usages in agricultural and non-agricultural operations, MPS reserves the right, should the reliability of the audits give due cause to do so, to require companies to also keep usage records for non-agricultural operations.
A.3 Participation of divisions of companies with separate accounts
If part of a company operates as a separate legal entity and keeps completely separate accounts, that part of the company may participate in MPS-ABC certification independently and under a separate MPS number. Applications in this regard must be submitted to MPS for approval via the CB. MPS does not regard separate receipts (invoices) as separate accounts.
A.4 The participant must meet its payment obligation at all times
By signing the MPS-ABC participation agreement, the participant enters into a payment obligation. Participants are informed about the participation costs via annual invoices and any relevant interim communication. The participant is responsible for ensuring that its payment obligation is met at all times.
A.5 The company must have a complaints register
All participants are required to maintain a register of complaints/comments relating to MPS issues which they receive from other participants, traders, auctions, etc. This register must also include details of any corrective measures taken pursuant to complaints or comments.

B. General technical criteria

Technical standard requirements that are not defined/recorded in the MPS record-keeping tool.

B.1 Records for rented and contract cultivation sites		
B.1.1 The participant must apply for a separate set of sub-records in the MPS record-keeping environment for every rented or contract cultivation site.		
B.1.2 Usage at every rented or contract cultivation site must be recorded in a separate set of sub-records in accordance with the criteria set out under 'Record-keeping criteria'.		
B.2 Crop protection agents and active substances		
B.2.1 No agents containing active substances included on the MPS Black List may be used or stored at the participating company.		
	i	Agents containing active substances on the MPS Black List may also not be used by third parties.
	ii	Agents containing active substances on the MPS Black List may also not be used by the participant or third parties for disinfecting packaging materials.
B.2.2 Only crop protection agents authorised for use in the country of use may be used.		
	i	Agents that are not authorised in the country of use may also not be used by third parties.
	ii	Agents that are not authorised in the country of use may also not be used by the participant or third parties for disinfecting packaging materials.
B.3 Integrated Pest Management Plan		
B.3.1 Participants must have a documented Integrated Pest Management Plan (IPM plan) complying with clause XXX of the Ground Rules, consisting of at least:		
	i	A description of the pests (including insects, diseases and weeds) of economic relevance to each crop.
	ii	For each pest, illustrations should be provided to aid identification of the pests, including symptoms in crops affected, conditions under which the pest can spread rapidly and the economic threshold for taking measures.
	iii	Description of possible and implemented preventive measures.
	iv	Description of pest monitoring methods and records of checks carried out.
	v	Management methods must be recorded along with their purpose.
	vi	Description of measures to reduce the development of resistance.
B.3.2 Preventive measures, checks and control measures carried out must be recorded in the IPM plan.		
B.3.3 The IPM plan must be made available to the auditor for inspection.		
B.4 Natural products		
B.4.1 Collection of natural products is only permitted with official permission from the owner. Documentary evidence of this must be present at the company (including material collected by third parties) and must at least include the following:		
	i	That permission has been granted for products to be collected.
	ii	For which products and associated quantities permission has been granted.
	iii	A declaration that no crop protection agents and/or fertilisers have been used on these products.
B.4.2 The area for which permission has been granted to collect natural products is not included in the MPS-ABC records.		

B.4.3 For the collection of natural products or the use of natural products collected by third parties, the participant must keep a mass balance which at least records the following:		
	i	Own collected material
	ii	Material purchased, broken down by supplier
	iii	Material sold, broken down by purchaser
B.5 Purchase of additional end products		
B.5.1 Additional end products purchased in order to supplement the participant's own production must at least have the same MPS-ABC qualification as the participant's company qualification.		
B.5.2 Additional plant material purchased for growing on as part of the participant's cultivation process must:		
	i	Have at least the same MPS-ABC qualification, OR
	ii	Be grown at the participating company for at least three months (if the total crop cycle is shorter than three months, at least two thirds of the crop cycle must have been carried out by the participating company).

C. Record-keeping criteria

C.1 Submission deadline for usage data		
C.1.1 Total usage data must be recorded and submitted within five working days of the end of an MPS period (four weeks).		
C.2 General Information Form		
C.2.1 The company-level General Information Form must be completed and submitted.		
	i	The company-level General Information Form must be completed in a full and truthful manner and submitted on commencement of record-keeping.
	ii	The company-level General Information Form must be reviewed and submitted by the participant annually.
	iii	Interim changes that affect the company-level General Information Form must be incorporated and submitted by the participant within ten working days.
C.2.2 A site-level General Information Form must be completed and submitted for every set of sub-records.		
	i	The site-level General Information Form must be completed in a full and truthful manner for every set of sub-records and submitted on commencement of record-keeping.
	ii	The site-level General Information Form must be reviewed and submitted by the participant annually.
	iii	Interim changes that affect the site-level General Information Form must be incorporated and submitted by the participant within ten working days.
C.3 Record-keeping preferences		
The participant must define and submit its record-keeping preferences.		
	i	Record-keeping preferences must be defined in full and submitted on commencement of record-keeping.
	ii	The participant must redefine and submit its record-keeping preferences annually.
C.4 Crop schedule		
C.4.1 The crop schedule for each set of sub-records must be recorded, consisting of:		
	i	Crops
	ii	Plots
	iii	Association between crops and plots
	iv	Percentage of environmentally certified starting material
C.4.2 The total area of plots created must match the total area covered by the set of sub-records as defined in the General Information Form for the set of sub-records concerned.		
C.4.3 The participant must keep its crop schedule up-to-date at all times.		
	i	The participant must make any changes to its crop schedule no later than five working days after expiry of the MPS period.
	ii	The participant must check that its crop schedule is up-to-date at least once a year.
C.5 Purchase of starting material		
Purchases of starting material must be recorded for each set of sub-records, including at least the following:		
	i	Date of purchase
	ii	Supplier
	iii	Product
	iv	Quantity
	v	Certificates associated with the starting material (MPS-ABC, MPS-GAP, MPS-PP or similar)

C.6 Stocks of crop protection agents and fertilisers		
<i>The participant can only access the stock module in the record-keeping environment if it has indicated in its company-level General Information Form that it wishes to keep stock records. Use of the stock module is subject to the following conditions:</i>		
C.6.1 On first use of the stock module, the participant must record its current stocks, including at least the following:		
	i	Name and code of the agent
	ii	Quantity present
C.6.2 The participant must record in the stock module any purchased agents that are physically added to the stocks, including at least the following:		
	i	Name and code of the agent
	ii	Delivery date
	iii	Quantity purchased
C.6.3 Agents removed from stock for any reason other than 'recorded usage' must be booked out of stock manually, with a record of at least the following:		
	i	Name and code of the agent
	ii	Date of removal from stock
	iii	Quantity removed
	iv	Reason for removal
C.7 Energy meters		
The participant must define the method used to record the various forms of energy (gas, electricity, heat) by recording its energy meters. At least the following must be recorded for each energy meter:		
	i	Basis for record-keeping (invoice/total reading/reading per meter).
	ii	Type of meter
	iii	Meter name and number
	iv	Recording of meter readings/usage
	v	Active yes/no
	vi	100% green yes/no (for mains electricity and gas meter)
C.8 Crop protection agent usage records		
C.8.1 Records must be kept of all crop protection agents used during the cultivation, storage and processing of the product at the company (including by subcontractors), including at least the following:		
	i	Name and MPS code of the agent
	ii	Quantity used
	iii	Date used
	iv	Used by participant or outsourced
	v	Plot and/or crops on which agent was used
C.8.2 Usage of crop protection agents is recorded per crop and per application.		
C.9 Fertiliser usage records		
C.9.1 Records must be kept of all fertilisers used during the cultivation, storage and processing of the product at the company (including by subcontractors), including at least the following:		
	i	Name and MPS code of fertiliser
	ii	Quantity used
	iii	NPK composition of fertiliser (if not known at MPS)
C.9.2 Usage of fertilisers is recorded per crop and per application.		

C.10 Energy usage records		
Records must be kept of all energy used during the cultivation, storage and processing of the product at the company, including at least the following:		
	i	Date on which meter reading taken, or period if records are invoice-based
	ii	Meter reading/usage
	iii	Gas and electricity: percentage of green energy
	iv	Gas: calorific value and conversion factor
	v	Other fuels: name and code
	vi	Usage and unit
C.11 Water usage records		
Records must be kept of the quantity of water used under human influence, including at least the following:		
	i	Date of water usage
	ii	Volume (m ³)
	iii	Source from which water obtained
C.12 Chemical soil disinfection		
C.12.1 Records must be kept of all uses of chemical soil disinfection agents, including at least the following:		
	i	Name and MPS code of the agent
	ii	Quantity used
	iii	Date used
	iv	Used by participant or outsourced
	v	Plot and/or crops on which agent was used
C.12.2 To be eligible for the Soil Disinfection Standard (only applicable to agents based on the active substance metam-sodium), participants must submit their permit to MPS.		

D. Company audits

D.1 Presence of accounts		
Original and full accounts must be present at the company when a company audit is carried out.		
D.2 Access to the company for company audit purposes		
The participant must allow the CB access to the company for the purpose of carrying out a company audit.		
D.3 Preparation for the audit		
The participant must prepare properly for the company audit by providing the following:		
	i	Full and accurate records
	ii	Summary of purchases of crop protection agents/fertilisers <i>(if the stock module is not used)</i>
	iii	
D.4 Initial company audit		
Any usage identified during the initial audit must match the usage recorded by the participant.		
D.5 Company audit		
Any usage identified during the company audit must match the usage recorded by the participant.		

E. Independent sampling

E.1 Access to the company for sampling purposes		
The participant must allow the CB, the standard owner and/or the sampler access to the company for the purpose of taking independent samples.		
E.2 Sample analysis		
The analysis of the sample taken must not show any active substances other than those recorded by the participant.		

MPS-ABC Sanction Regulations

A. Basic criteria for participation in MPS-ABC

Requirement		Infringement	Consequences for qualification status	New audit ¹	New sample ²	Consequence for RI ³ :
A.1	The CB must be in possession of a signed copy of the quotation.	The CB has not received a signed copy of the quotation.	<i>Record-keeping cannot commence.</i>	-	-	-
A.2	Participant must keep a record of usages in all the company's agricultural operations.	Usage on one or more crops/at one or more sites not recorded.	NQ [indefinite period] <i>Until the participant has included all company operations in its records</i>	-	-	-
A.3	All parts of the company falling under the same accounts must be recorded under one MPS number.	Parts of the company without independent accounts have not been included in the MPS records or are recorded under a separate MPS number.	NQ [indefinite period] <i>Until the participant has included all parts of the company in the MPS records in the correct way.</i>	-	-	-
A.4	The participant must meet its payment obligations promptly.	Payment obligations are not met promptly.	NQ [indefinite period] <i>Until the participant has met its payment obligations.</i>	-	-	-
A.5	The company must have a complaints register.	The company has no complaints register.	<i>Participant is given three months in which to demonstrate the existence of a complaints register.</i>	-	-	-
		Corrective measure has not been carried out within the set time frame.	NQ [indefinite period] <i>Until the participant can demonstrate the existence of a complaints register.</i>	-	-	-

¹ Additional audits at participant's expense

² Additional sampling at participant's expense

³ Reliability Index (see section 4 of the MPS Certification Standard Ground Rules for more information)

B. General technical criteria

Requirement		Infringement	Consequences for qualification status	New audit ¹	New sample ²	Consequence for RI ³
B.1	Participant must meet the requirements for recording rented and contract cultivation sites.	Not all the participant's rented and contract cultivation sites are included in its MPS records.	<i>Participant is given three months in which to record all rented and contract cultivation sites in its MPS records.</i>	Desk audit after three months.	-	-
		Record-keeping for rented and contract cultivation sites does not comply with record-keeping criteria C1-C11.	NQ [indefinite period] <i>A qualification can again be awarded once the records are fully updated.</i>	-	-	-
		Corrective measure has not been carried out within the set time frame.	NQ [indefinite period] <i>Until participant meets its obligations in criteria B.1.</i>	-	-	-10
		Every subsequent observation within the next two years.	NQ [indefinite period] <i>Until participant meets its obligations in criteria B.1.</i>	-	-	-15
B.2	Only crop protection agents permitted within MPS-ABC may be used.	The records reveal the use of an active substance that is not permitted in the country of use.	NQ [12 weeks]	-	-	-
		The records reveal the use of an active substance on the MPS Black List.	NQ [12 weeks]	-	-	-
B.3	Participant must have an up-to-date Integrated Pest Management Plan.	Participant does not have a full or partial IPM plan that complies with general technical requirement 9.1.	<i>Participant is given three months to draw up an IPM plan.</i>	Desk audit after three months.	-	-
		Participant's IPM plan is not up-to-date.	<i>Participant is given three months to update its IPM plan.</i>	Desk audit after three months.	-	-
		The IPM plan is not available for inspection during the audit.	<i>Participant must send the IPM plan to the CB for checking within 28 days.</i>	Desk audit within 28 days	-	-

Requirement		Infringement	Consequences for qualification status	New audit ¹	New sample ²	Consequence for RI ³
B.3	Participant must have an up-to-date Integrated Pest Management Plan (<i>continued</i>).	Corrective measure has not been carried out within the set time frame.	NQ [indefinite period] <i>Until participant complies with its obligations in criterion B.3.</i>	-	-	-
		Every subsequent observation within the next two years.	NQ [indefinite period] <i>Until participant complies with its obligation in criterion B.3.</i>	-	-	-
B.4	Participant must comply with the conditions for natural products.	Participant does not comply with the criteria for natural products.	<i>Participant is given three months in which to comply with the criteria.</i>	Desk audit after three months.	-	-
		Corrective measure has not been carried out within the set time frame.	NQ [indefinite period] <i>Until participant complies with its obligations in criterion B.4.</i>	-	-	-
		Every subsequent observation within the next two years.	NQ [indefinite period] <i>Until participant complies with its obligations in criterion B.4.</i>	-	-	-
B.5	Participant must comply with the conditions for the purchase of additional end products.	Additional end products purchased do not have at least the same MPS-ABC qualification.	-	Within six months	-	-5
		Every subsequent observation within the next two years.	NQ [12 weeks]	Within one year		-15

C. Record-keeping criteria

Requirement		Infringement	Consequences for qualification status	New audit ¹	New sample ²	Consequence for RI ³
C.	Record-keeping criteria					
C.1- C.11	Records must be complete and up-to-date in accordance with record-keeping criteria C1-C11.	Records do not comply with the requirements at the end of an MPS period.	-	-	-	-2
		Records do not comply with the requirements at the time of qualification.	NQ [indefinite period] <i>A qualification can again be awarded once the records are fully updated.</i>	-	-	-
		Participant has not entered periods outside the active record-keeping period (frozen periods).	NQ [indefinite period] <i>A qualification can be re-assigned after 13 periods of continuous record-keeping, following a company audit.</i>	-	-	-

D. Company audits

	Requirement	Infringement	Consequences for qualification status	New audit ¹	New sample ²	Consequence for RI ³
C.	Record-keeping criteria					
D.1	Original and full accounts must be present at the company location at the time of the audit.	Original accounts are not present and/or are not complete.	<i>Audit is discontinued.</i>	Within eight weeks	-	-5
		During the re-audit, it is once again discovered that the original accounts are not present and/or are not complete.	NQ [12 weeks]	After 12 weeks	-	-10
D.2	Participant must grant the CB access to its company to conduct a full company audit.	Participant cancels an announced company audit for good reason.	-	Within eight weeks	-	-
		Participant cancels an announced company audit without good reason.	-	Within eight weeks	-	-15
		Participant cancels an announced company audit again without good reason.	NQ [12 weeks]	Within 12 weeks	-	-15
D.3	Participant must prepare properly for the audit.	At the time of the company audit, participant has NQ status as a consequence of having incomplete or outdated records.	<i>Participant must update its records in order to qualify for a new audit.</i>	As soon as records are updated	-	-
		Summaries not available	<i>Possible extra audit time or new audit at participant's expense</i>	-	-	-
D.4	Usages observed during the initial audit must match recorded usages.	The audit data differs significantly ⁴ from the recorded usage data.	Participant	After six months	-	-

⁴ Total of ≤ 10 points difference in qualification
MPS-ABC Certification Standard v.16
Certification Criteria

Requirement		Infringement	Consequences for qualification status	New audit ¹	New sample ²	Consequence for RI ³
D.5	Usages observed during the company audit must match the recorded usages.	The audit data differs slightly ⁵ from the recorded usage data.	<i>Correction of data by CB</i>	-	-	-5
		The audit data differs significantly ⁶ from the recorded usage data.	<i>Correction of data by CB</i>	Within six months	-	-15
		Within six months the audit data is again found to differ significantly from the recorded usage data.	NQ [12 weeks] <i>Correction of data by CB</i>	Within six months	-	-20

⁵ Total of ≤ 10 points difference in qualification

⁶ Total of > 10 points difference in qualification

E. Independent sampling

Requirement		Infringement	Consequences for qualification status	New audit ¹	New sample ²	Consequence for RI ³
E.1	Participant must allow free access to the company for the purpose of taking independent samples.	The sampler is denied access to the company by the participant or its staff without good reason.	-	-	Within two weeks	-10
		The sampler is prevented from freely choosing a sampling site.	-	-	Within two weeks	-5
		During the following sampling, the sampler is once again prevented from freely taking samples without good reason.	NQ [12 weeks]	-	Within 12 weeks	-15
E.2	The usage data recorded must match the results of the analysis of the sample taken.	The analysis reveals the use of a non-recorded but authorised active substance.	<i>Participant must record the use of the active substance concerned.</i>	-	Within eight weeks	-5
		The analysis reveals the use of a non-recorded substance that is not permitted in the country of use.	NQ [12 weeks] <i>Participant must record the use of the active substance concerned.</i>	-	After eight weeks	-10
		The analysis reveals the use of a non-recorded substance on the MPS Black List.	NQ [12 weeks] <i>Participant must record the use of the active substance concerned.</i>	-	After 12 weeks	-15
