MPS-Insights

Insight into your sustainability performance
without certification or audits

MPS has been helping growers achieve greater sustainability for almost 30 years. We are the market leaders in providing insights into sustainability efforts for the ornamentals sector with the MPS-ABC certificate. **MPS-Insights** allows you to log your usage and obtain the same insight into your environmental performance but without audits or certification.

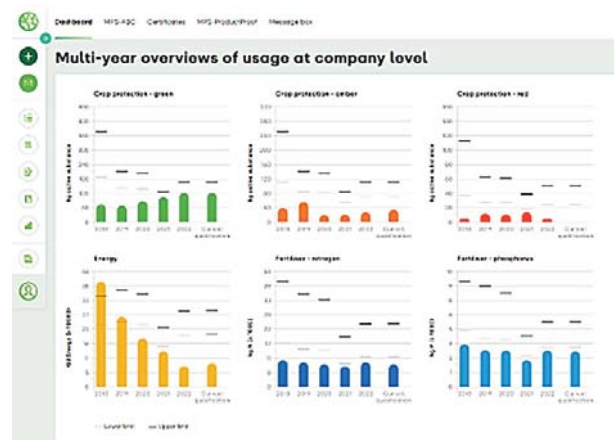

MPS INSIGHTS

While more and more growers want to be well-prepared for the increasing demand for certification and residue analysis and are seeking measurable data and an anonymised benchmark, they are not quite sure where to begin. MPS-Insights offers an easy way of recording usage data and receiving relevant feedback in the form of clear data visualisations on a digital dashboard.

You can regularly log your usage of crop protection agents, fertilisers, energy, and water. This monitoring can be done at company level, but preferably also at crop level, which allows you over time to build up reliable data in clear overviews.

This lets you optimise your resource management and make more sustainable choices, for example in the use of crop protection agents, as our database shows you directly which category each agent belongs to.

MPS-Insights

Logging usage without certification or audits

MPS-Insights is the basis for all other MPS certificates in addition to, for example, a range of external audits. A key benefit of using MPS-Insights is that if you need data for a footprint calculation, you have already recorded a significant part of the required information. The FloriPEFCR-compliant HortiFootprint Calculator, developed by MPS and LetsGrow.com, allows you to supplement your data and produce a footprint calculation faster than ever before.

Features

- The basis for all other MPS certificates, such as MPS-ABC and MPS-GAP.
- Only usage record-keeping: no audits or certification.
- Free startup (online).
- Clear and informative data insights.
- If supported, link to your crop protection supplier's system.
- Stock management option.
- Data can be exported.
- One-stop shop with the option to introduce additional MPS certificates that suit your company.
- Personal contact for inquiries, with Service & Support or your own regional Coordinator.
